TERMS OF SALE

2% for cash with order
or 2% 10 days, 30 days net for established accounts.

Unless otherwise specified, Bulbs will be shipped when dug in the Fall. Approximate earliest delivery date is indicated for each variety.

We will accept orders for spring delivery provided they reach us not later than December 1. Spring orders will be placed in cold storage and shipped as directed at no extra cost until April 1. After April 1 a nominal charge will be made for storage.

All Bulb prices are F.O.B. Lake Grove, Oregon, and are subject to change without notice.

Our wholesale price lists are intended for the trade only. Kindly do not hand them to amateur growers.

In ordering please specify whether shipment is wanted via parcel post, express, or freight. If wanted by post kindly include postage with remittance.

In shipments of 100 pounds or more we find air freight rates to the principal cities cheaper than railway express or equivalent to motor freight rates. In many instances this may be your cheapest and fastest means of delivery.

We will accept Trade orders for direct shipments to retail customers at our regular prices for the quantities involved plus postage and a moderate packing charge. We suggest that such orders be accompanied by the seller's mailing labels properly addressed and such shipping instructions as may be needed.

Orders for growing crops accepted subject to crop failures, shortages, or other matters beyond our control.

Any claims for shortages or errors must be made within five days after receipt of goods as we will not be responsible after that time. We give no warranty, expressed or implied, as to description, quality, productiveness or any other matter in connection with the success of the seeds, bulbs or plants sold by us and will not be responsible in any way in cases of failure, other than to replace bulbs untrue to name. If the purchaser does not accept the goods on these terms, they are to be returned at once.

QUANTITY RATES ON LILY AND MISCELLANEOUS BULBS

25 Bulbs one variety and size at 100 rate.

250 Bulbs one variety and size at 100 rate less 10%.

Wholesale orders cannot be accepted for less than five bulbs of one variety and size except on items priced per each. Where so priced 1 to 25 bulbs will be supplied at the each price, 25 or more at single bulb price less 10%.

Flowering size indicates bulbs which will have flowered at least one season in our nursery. Large or 1st size bulbs are top size for the particular variety.

In compiling this list of northwest grown lilies we have added several varieties of which we have ample stock to offer this season. In addition we grow moderate quantities of a number of other varieties and welcome inquiries concerning any which are commercially available at the present time.

In the following price list we have endeavored to briefly describe all of the stock offered by indicating flower type and size, color, height (maximum average for mature established bulbs) and flowering period under Northwest climatic conditions.

LILIES

For Garden and Greenhouse

Our 1963 catalogue again offers to the nursery and horticultural trade a most complete list of hybrid and specie lilies and marks the 33rd season of specializing on this stock. In retrospect it seems but a very short time for such marked changes in the genus to occur. From a listing which was predominantly species in the early 1930's we now have the reverse with hybrids in the ascendancy and increasing in numbers each year. However, specie lilies continue to hold the interest of many experienced growers and our list of these is most complete.

The increased interest in lilies during recent years has been greatly due to the numerous exhibitions sponsored by regional and national lily groups. Professional horticulturists will find it profitable to attend these shows and join the societies in their locality. The North American Lily Society deserves the support of all lily enthusiasts. For full information address the Treasurer, Mr. Ernest F. Stokes, 21 Oakland St., Lexington 73, Mass.

During the past year our lilies were exhibited at the majority of the lily shows in America with outstanding success, the most important award being the Gold Medal for the Best Exhibit at the World's Fair Lily Show in Seattle. This, along with similar top awards received previously at the New York and San Francisco World Fairs and numerous other exhibitions, is most encouraging to us in the production of Gold Medal quality lilies in wide variety.

We are again offering a number of specialty lines such as Hardy Cyclamen, Erythronium, Trillium, etc., and are adding to these stocks as rapidly as possible. These plants are finding a greatly increased market each year with gardeners who are interested in the unusual and in stock of easy culture.

Following are several new introductions for 1963 which we offer with confidence as being valuable additions to any lily collection. We are also able to supply this season our Centennial Hybrids in color selected strains, all bulbs carefully selected at flowering time with only the best reserved for shipment. Although we endeavor to maintain adequate stocks of all bulbs offered, early orders would be most helpful in assisting us to complete shipment promptly on the dates noted in our list. We assure you that all orders will be executed with the best stock available, with each order our personal responsibility.

1963 INTRODUCTIONS

L. AURELIAN PAGODA BELLS—An unusually vigorous and dependable strain with strong, erect stems bearing, in pagoda-like heads, 6 to 20 white bells blended with tones of pink and apricot. 5 to 8 feet. Mid-July.

L. AURELIAN HYBRID "CARNIVAL QUEEN"—Large, out-facing, fully reflexed, white flowered clone. The base of the petals is apricot, which color extends in a narrow band almost to the tips. Six to twelve flowers are carried on strong 4 to 5 foot stems in Mid-July. Handsome foliage.

L. AURELIAN HYBRID "TA MING"—Semi-reflexed, 4½ inch diameter flowers of Nankeen yellow blending to Ta Ming yellow at the center. Half out-facing. Slight papillae at base of petals, anthers golden yellow. 5 feet. Late July to early August.

L. CORDATUM GIANT FORM—Rare form approaching L. Giganteum in height and flower size. The large trumpets are greenish white until fully open then turning to pure white with golden yellow anthers. The heart-shaped leaves are copper colored during early growth and change to dark green by summer. Height 5 to 6 feet. July.

L. DAURICUM LUTEUM HYBRIDS—Uniform strain of early flowering upright lilies derived from crosses of L. Dauricum Luteum with the best yellow forms of Gold Cup Hybrids. The large cup-shaped flowers are primrose yellow to canary yellow dotted black, carried on 1½ to 2 foot stems in late May and early June. Excellent for forcing and cutting.

LILY HYBRIDS

The Aurelian Hybrids—Flower Types contained in this group comprise three distinct forms as follows:

CORONAS—Reflexed or recurved in varying degrees. Petals of medium width. Moderately tall plants producing flower heads excellent for cutting as well as garden decoration.

FLARES—Large, wide flaring flowers intermediate in form between Trumpet and Recurved. A very distinct flower type with a brilliant color range.

TRUMPETS—True Trumpet shaped flowers on medium to tall stems. The flowers are large and of heavy texture.

The above three Types are subdivided into select color strains as offered below. The color strains are carefully selected at flowering time to eliminate any off colors or inferior blooms.

In addition we offer several select clones in the Aurelian group and a strain of special select semi-bowl and semi-recurved types in pastel colors.

L. Centennial Hybrids — An exceptional strain derived from second generation crosses of selected forms of auratum and speciosum and their hybrids such as Jillian Wallace, the Potomac Hybrids and others. The flowers are broad petalled, wide open bowl shaped, slightly recurved at the petal tips. The colors range from bright pink to carmine red generally spotted deeper pink or red and margined white. Unlike the red banded forms of *L. auratum* the colors do not brown with age. White flowered selections are also available, the blossoms lightly dotted lavender. The stout stems rise to four or five feet and the flowers measure up to 10" across. Flowering time early to mid-August.

The Centifolium — Temple Hybrids — The countless variations of flower shapes and color tones of the Temple Hybrids are fantastic. Each plant has an individual beauty unlike all the others. This constantly improving strain of tall trumpet lilies is the product of many years of selective hybridizing of the native species of China and Burma. All of the Temple Strains are selected seedling bulbs which are marked separately during the flowering season each year.

Amethyst Temple — Massive trumpets varying in color from light amethyst pink to deep columbine red. Both the light and dark selections are rich and clear in this amethyst color and are free of any distracting brown overtones. The pink and amethyst shading is on the interior as well as the reverse of the petals. Splendid for cutting or in the garden. In warm sections, planting in light shade is preferable to avoid bleaching. 5 to 7 feet. July flowering.

Marble Temple—All of these choice lilies are unusually beautiful, strong growing, and very resistant to disease. The varying tones of lustrous white, ivory, or cream-white with the contrasting exterior markings resemble the colors seen in the finest marble. The large trumpets vary in their external color from pink, red, burgundy, brownish-purple, fawn, olive, cream-yellow, green, or to many multi-colored variations. The centers are yellow, light green or pure white. Some trumpets are funnel shaped; others are more open with rolled petal tips; and some are bowl-shaped. 5 to 7 feet. July and early August flowering.

Sun Temple—The new Sun Temple Hybrids are now one of the most remarkable of all yellow trumpet lilies. Seen with other yellow trumpet lily strains, their distinct color at once stands out as bright, clean, and uncluttered with other clashing exterior markings. From near or afar, they look yellow and are yellow inside and outside. Their uniform color spectrum is from lemon yellow to primrose yellow. Some are faintly marked with a narrow soft green exterior rib, but this shading blends well with the yellow and does not offer an unpleasing contrast. Sun Temple is also very vigorous in its growth and its color holds up well in hot summer weather. July and August flowering. Height 5 to 7 feet.

Our "Reference Chart of Lilies for Garden and Greenhouse" contains over 2000 items of cultural information covering most of the commercial lilies. Single copies are available to the wholesale trade at .85 each postpaid. On request we are prepared to quote quantity prices on the chart for resale. A number of our customers are offering it in their catalogue listing lilies.

"Basic Lily Culture," our new pamphlet of information for both the novice and experienced grower, is designed to answer the questions most usually asked concerning the successful cultivation of hardy lilies and is based on over 30 years experience with the genus. Copies may be secured at a cost of 8 cents each in any quantity up to 100. We will be pleased to quote prices on larger quantities upon request. We feel that it will be of material benefit to the Trade to include these instructions with all retail lily orders, particularly to customers who have had limited or no experience in Lily culture. A successful beginning will most likely assure repeat orders in future years.

"Hardy Cyclamen Culture," a leaflet of complete instructions on growing these popular plants will be included with all cyclamen orders. Additional copies will be supplied at 7 cents each.

We will also include with each cyclamen order a copy of our new color display card. This card is designed to assist in the sale of these plants by mentioning their chief attributes in concise, quickly readable form. We suggest using the card with displays of cyclamen corms or plants either for nursery or counter sale. Additional copies are available on request.

As mentioned in our previous Trade lists, we now have available a new set of color transparencies for lecture and sales aid use. This set has been expanded during the past years and the list now includes over 250 subjects from which to choose. These photographs can be supplied as slides (2 x 2), enlarged transparencies in sizes 2 1/4 x 3 1/4 and larger, or as color prints. A complete list of subjects available and details of their cost will be sent promptly upon request. In corresponding kindly advise whether slides, enlarged transparencies or prints are needed and approximate quantity.
